

**Flexor 5000** (Diabetic - Arthritic)

Materials: Thin Poly Pro shell (less than 1.2mm) sandwiched between a full length 1/8" Perf Rx topcover and a full length padded bottom cover. A thick durometer mid arch fill is included for exceptional softness and cushioning. Note: Pink Plastazote may be substituted for the Perf Rx topcover for a slight additional charge.

**NEW! Soft Sole** (Diabetic - Arthritic) ("New" low bulk)

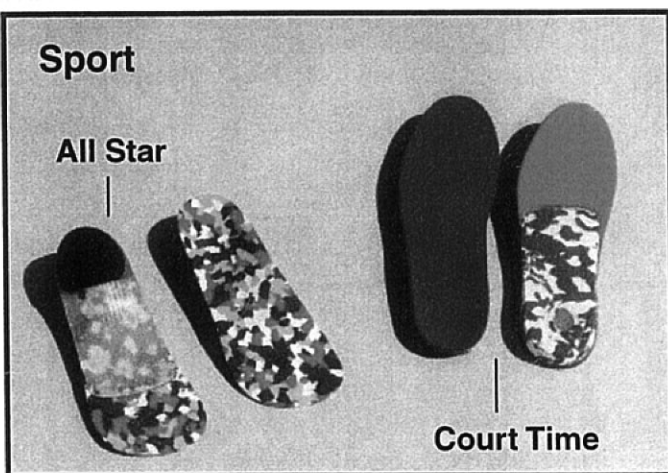

Materials: Low bulk Poly Pro shell to fit in a wider variety of shoes. A full length pink Plastazote topcover comes standard with this appliance. Rear foot posting is intrinsic. Note: Perf Rx or Spenco may be substituted for the full length Plastazote top cover at no additional charge.

**Trans Rx Walker** (Casual Shoe; Minor bio-mechanical problems)

Materials: Poly Pro shell sandwiched between a full length Perf Rx top cover and a full length padded bottom cover. A firm EVA crepe mid arch fill is included.

**Land Rover** (Minor bio-mechanical problems)

Materials: Our most sold accommodative functional custom orthotic fits in a wide variety of shoes. A 1/8" Perf Rx full length top cover and padded full length bottom cover surrounds a 2.8mm Poly Pro shell and a moderately stiff EVA arch fill.

**All Star** (Long distance running-cycling-walking)

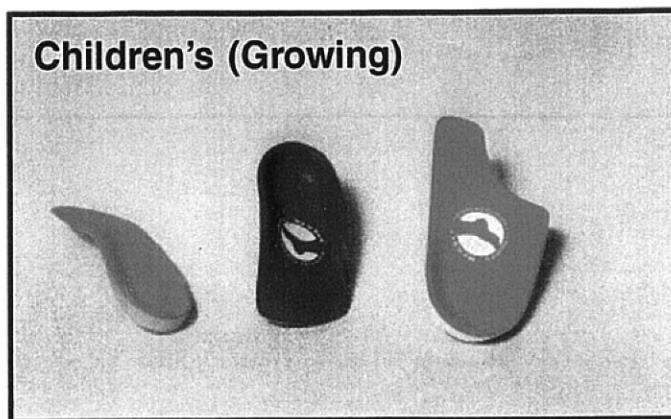

Materials: Poly Pro shell made to exacting standards of rigidity and bulk. A sulcus or full length padded Swirl top cover comes standard with this appliance as well as extrinsic crepe padded rear foot posts. Note: A Perf Rx or similar padded top cover may be substituted for Swirl at no additional charge.

**Court Time** (All Court and Racquet Sports)

Materials: Designed to be used by professional basketball teams, this sophisticated appliance is crafted with a full length 1/8" Perf Rx top cover over a 2.9mm Poly Pro shell. A full length 1/16" Cloud padded forefoot extension and a dual density crepe EVA mid arch fill are included.

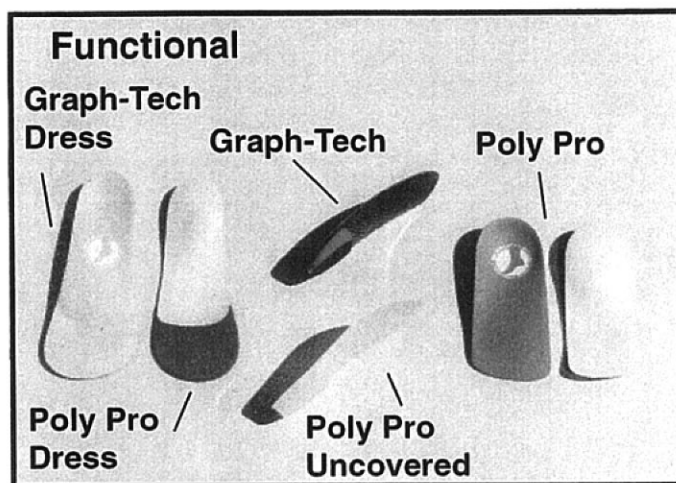

**NEW! Slim Sport** (Cleats and Low Heel Seats)

Materials: Intrinsic rear foot design includes a low bulk Poly Pro shell for those "problem" shoes or cleats where an extrinsic rear foot posted orthotic just won't fit. Standard materials include a full length Swirl top cover and a full length cloud bottom cover or full extension with your choice of padding.

**Growing** (Orthotics for "Growing" Children)

One low price includes "all" children appliances, i.e.: Whitman-Roberts, Shaffer Plate, Gait Plate, Heel Stabilizer.

**Poly Pro** (Functional-plantar fasciitis; heel spurs)

Materials: Our most sold functional polypropylene orthotic. Rear foot extrinsically or intrinsically posted, this low bulk orthotic comes uncovered or covered with a standard met length Naugahyde top cover. Note: Additional top cover lengths are available at a slight charge.

**Poly Pro Dress • Poly Pro Fashion** (High heels, flats, loafers)

Materials: Quite likely the thinnest low bulk dress orthotic anywhere. A Naugahyde topcover is standard to include a padded sulcus length extension. The fashion orthotic includes a wider grind than our standard dress appliance.

**Graph-Tech • Graph-Tech Dress**

Materials: Carbon composite shells are incorporated into these two appliances. The Graph-Tech includes a met length top cover. Crepe heel posts are available at a slight charge. The Graph-Tech dress comes standard with a narrow grind and a sulcus length Naugahyde top cover with a padded fore foot extension.

**NEW! Slim Tech** - Women and Men's Oxfords ("New" low bulk design)

Materials: This appliance is for those patients that require a low bulk orthotic but demand more function than a dress or fashion appliance. Standard materials include a thin Poly Pro shell covered with a full length Naugahyde top cover and full length padded forefoot extension. Your choice of a full length extension or full length bottom cover is included.
